→ Extremely powerful and full featured is what the *Seafarer Captain* is all about. It has enough power to handle 3D navigation, monitoring and entertainment all at the same time. Combine this system with up to 3 displays (e.g.: HD TV, a navigation station and helm display).

If size and power consumption is not your first concern this is the system for you.

→ Navigation: Top navigation software, such as Nobeltec Admiral®, demands powerful high quality hardware. The *Seafarer Captain* provides that platform. Expandability and scalability are offered without sacrificing large amounts of space. This system will easily fit in a cabinet or possibly in the back of a Nav station.

→ Entertainment: Watch TV and HD DVDs, listen to music, interface with your IPOD or surf the Internet, it's all possible with the *Seafarer Captain*.

→ Mobile Office: Do you want to take your office with you? With an onboard computer system from Cool Fire Marine, you can handle your office needs from anywhere you can get an Internet connection.

→ Flexibility: Every Cool Fire Marine PC is custom made for our clients. This means we can add, or subtract, any hardware or software to our systems. Have a specific budget, we can build the best system that budget can buy, discussing the pros and cons of each component.

→ Support: We are a 100% American, family-owned company located in Havre de Grace, Maryland. We sail the Chesapeake. Our systems are hand built by qualified technicians, right here in Maryland. If there is a problem with any of our systems, you talk to us, not an overseas help desk.
