→ Good power and features packed in a small package is what the *Seafarer Mate* is all about. Use this system for navigation, monitoring, or entertainment. Combine this system with 2 displays standard (3/4 displays are optional).

If size and power consumption are your first concern, this is the system for you.

→ Navigation: top navigation software, such as Nobeltec Admiral<sup>®</sup>, demands powerful high quality hardware. The *Seafarer Mate* provides that platform. This system is designed for the boat owner that needs a full featured PC solution, but wished to conserve space and power. This unit is Ideal for smaller powerboats and sailboats of any size.

→ Entertainment: Watch DVDs, listen to music, interface with your IPOD or surf the Internet, it's all possible with the *Seafarer Mate*. Add an optional USB TV tuner and watch broadcast, cable, or satellite TV.

→ Mobile Office: Need to take your office with you? With an onboard computer system from Cool Fire Marine, you can handle your office needs from almost anywhere.

→ Flexibility: Every Cool Fire Marine PC is custom made for our clients. This means we can add, or subtract, any hardware or software to our systems. Have a specific budget? We can build the best system that budget can buy, discussing the pros and cons of each component.

→ Support: We are a 100% American, family owned company located in Havre de Grace, Maryland. We sail the Chesapeake. Our systems are hand built by qualified technicians, right here in Maryland. If there is a problem with any of our systems, you talk to us, not an overseas help desk.
